RE: Petition under FCAAA [42 U.S.C. 7661] Title V Section 505.b.2 to Administrator Region X EPA for Objection by EPA to issuance of State of Washington Air Operating Permit No. 01-96 -August 6,1996 under Olympic Air Pollution Control Authority

I submit this petition for objection by the Administrator that AOP 01-96 is not in compliance with the applicable requirements of the Act including the requirements of an applicable implementation plan.

AOP 01-96 fails to meet the requirements of Title III Sec 302 g,h,k,l,m,n,p,q, and Title V, Sec 504 a, b,'c' f,, among others.

The documentation of this failure was provided to OAPCA during the public comment period for the permit, as shown by the enclosed documents sent to the permitting agency during the public comment period and the long history of complaint against K-Ply air emissions impacting the welfare of the residents and the environment in Port Angeles.

The substantial complaint history against the facility is documented by extensive written materials, photographs, telephone complaints to the agency directly, and presented to the facility itself during the Air Quality Forum meetings attended by DOE and K-Ply and the Department of Health from 1992-1996.

As evidence that K-Ply continues to be out of compliance with requirements of the Act for noxious impact on the welfare of residents both by opacity and odors, I enclose a copy of the spontaneous complaints to the Clean Air Hotline (452-7493) against K-Ply emissions on September 26-30, 1996.

I look forward to your attention to this petition.

Sincerely,

Barbara T. Osborne  
Clean Air Hotline (452-7493)
